

Intrusion Prevention & Outdoor Video Monitoring for Auto Dealerships

Dear NADA attendee,

Stop by **BOOTH #1262W** at the NADA convention and learn how [video technology](#) has changed the way auto dealers now protect millions of dollars worth of outdoor inventory.

You can cost effectively [detect](#) and [deter](#) criminal activity around the entire perimeter of your outdoor car lot, [24/7](#), without the headache of using unreliable guards.

The most advanced and proven [remote video and audio surveillance](#) services will help you:

- **PREVENT** Theft and Vandalism
- **PROTECT** Outdoor Inventory
- **ELIMINATE** On-Site Guard Costs
- **REDUCE** Insurance Costs
- **PROVIDE** Peace of Mind

Our technology automatically detects the intruder and streams live video, audio and data to our central station where our security specialist immediately addresses the intruder through a live speaker in the car lot and notifies the police when necessary. This [real-time](#) detection and response technology has been proven effective for the past three years.

Major auto dealer groups such as: DCH Auto Group, Paul Miller Auto Group, Paragon Honda and Acura, were able to retire their guards, achieve increased security and save money.

Call me at 877-843-0099 to set up a time to meet, or simply stop by **BOOTH #1262W** to say hello!

Regards,

Juda Slomovich, COO
